
Application Launcher Software Crack [Latest-2022]

Application Launcher Software Crack+ (Final 2022)

Application Launcher Software is a small Windows application designed specifically for helping you create a list with utilities, folders, URLs, and email addresses that you frequently use. The tool lets you create shortcuts in order to launch your favorite items. Clean feature lineup You are welcomed by a user-friendly interface that integrates only a few configuration settings that you can tinker with. The main panel is divided into two areas: with one displaying the groups while the other reveals the shortcuts embedded in each group. Main features Application Launcher Software gives you the possibility to create multiple groups and edit or delete the selected ones. Additionally, you are allowed to change the group text color and add a background image from your computer (BMP, JPG, or GIF file format). What's more, when it comes to adding a new shortcut, you can insert a caption, enter a description, provide the app or folder path, insert parameters for the utility that you want to open, open the window as normal, minimized or maximized, as well as alter the font color. Last but not least, you can launch items with just a single click, and edit or delete them. Performance Since it doesn't require much computer knowledge to set up the dedicated parameters, even less experienced users can learn to master the entire process in no time. Tests have shown that Application Launcher Software carries out a task quickly and without errors. It leaves a minimal footprint on system resources, so the overall performance of the computer is not affected. Bottom line All things considered, Application Launcher Software proves to be a handy piece of software worth having whenever you need to launch frequently used items.
